WORK EXPERIENCE

GMO-Z.com Runsystem June 2019 - Now

Front-end Developer

Do projects from Japanese customers.Typical customers: NHK Television, Chintai, Fintech...etc...

- **Fintech– Web Platform Development**
  - **URL**: https://paydar.com/
  - **Role: Front end Developer**

Key Responsibilities & Achievements:

- **Engineered** complex features and UI components using **TypeScript**, enhancing code quality and maintainability.
- **Implemented** responsive designs using **SCSS** and **Tailwind CSS** to achieve a modern, "pixel-perfect" user interface.
- **Integrated** dynamic data from the backend API (built with NestJS) using the **Axios** library.
- **Optimized** page load performance and user interaction speeds.
- **Technologies:** TypeScript, SCSS, Tailwind CSS, Axios, NestJS (Backend context)

- **Chikiipay – E-wallet Mobile App**

- **Role: sub-lead (team 5 members)**

A payment solution application developed for Japanese market.

- Developed core features using Vue 3 and TypeScript.
- Automated front-end testing using Appium and CodeceptJS.
- Ensured mobile responsiveness and security in sensitive UI flows.
- **Technologies**: Vue 3, TypeScript, Appium, CodeceptJS, Tailwind CSS, GitLab CI/CD.

🔹 **Metauranai – Fortune Telling Platform**

- **Role: Leader (team 4 members)**

A web app for fortune-telling content and user interaction.

- Built features using React (Next.js) and integrated with backend APIs.
- **Technologies**: Next.js, React, JavaScript, Firebase, PlayCanvas, AI.

🔹 **RKKCS – Management System**

- **Role: Front end Developer**

A management platform for internal use by a Japanese client.

- Developed and maintained front-end features using Vue.js and Nuxt.js.
- Built reusable UI components and optimized performance.
- Integrated RESTful APIs and handled dynamic data rendering.
- Wrote unit tests with Jest following TDD principles.
- **Technologies**: Vue 2, Nuxt.js, JavaScript, SCSS, Axios, Jest

🔹 **NHK School CMS & NHK Archives**

- **Role: Front end Developer**

Content management systems for NHK's educational platforms.

- Implemented admin dashboards and dynamic content modules.
- Collaborated with UI/UX designers to ensure pixel-perfect interfaces.
- Resolved bugs and improved UI performance.
- **Technologies**: Vue 2, Nuxt.js, Tailwind CSS, Vuex, GitLab CI/CD.

🔹 **Drill – Online Exam Platform**

- **Role: Front end Developer**

An online examination system designed for Japanese students.

- Built interactive quiz and test-taking interfaces using Vue 3.
- Integrated front-end with backend via RESTful APIs.
- Implemented features for real-time feedback and scoring.
- **Technologies**: Vue 3, TypeScript, RESTful API, SCSS

🔹 **RemoteWork Cloud – Task and Collaboration Tool**

- **Role: Front end Developer**

A cloud-based remote work management platform.

Website: https://remotework-cloud.com/

- Developed UI features using Nuxt 3 and TailwindCSS.
- Connected front-end logic with backend APIs for task and project management.
- Optimized components for performance and mobile responsiveness.
- **Technologies**: Nuxt 3, Vue 3, Tailwind CSS, RESTful API

🔹 **ChintaiDX – Hotel Management Software**

- **Role: Front end Developer**

A hotel management platform for real estate services.

- Built responsive front-end pages using Vue.js.
- Integrated interactive features with real-time data updates.
- **Technologies**: Vue 2, JavaScript, GraphQL, GitLab CI/CD

TQ Design June 2017 - April 2019

Front-end & Back-end Developer

Maintained and developed responsive websites using HTML5, CSS3, Bootstrap 4, and jQuery. Supported backend development with C# (ASP.NET) and CMS management.
Converted PSD designs into high-quality HTML/CSS templates ensuring pixel-perfect accuracy.
Key projects utilized HTML5, CSS3, jQuery, and C#:

1. https://thanhphocaphe.com
2. https://dragonvillage.com.vn
3. https://tqdesign.vn
4. https://themax.vn
5. https://kingdom101.tqdesign.vn
6. https://akaricity.vn

BSD SOLUTION Jan 2017 - May 2017

Back-end Developer (ASP.Net)

Developed product **sugar cane house manager** for TTC Group

FPT Shop March 2016 - Jan 2017

Back-end Developer (ASP.Net)

Developed web MVC webform, use database SQL Server for back-end,
Utilized Bootstrap, HTML5/CSS3, jquery library, technical web responsive.
Participated projects:

1. vieclam.fptshop.com.vn (revamped website, developed new landing page),
2. inside.fptshop.com.vn

HONORS & AWARDS

Employee of the year award (Front end) - GMO Z.com Runsystem company **2022**
